

Recruitment Analytics Project Report

Project Overview

Developed an end-to-end Recruitment Analytics solution using Excel, Python, SQL (Oracle), and Power BI to analyze candidate hiring data and optimize recruitment performance.

Objectives

Analyze recruitment pipeline, identify top hiring sources, monitor recruiter performance, evaluate hiring trends, and provide actionable insights.

Tools & Technologies

Excel, Python (Pandas), Oracle SQL, Power BI, DAX.

Workflow

Generated dataset (1000+ records), cleaned data in Python, analyzed with SQL, connected to Power BI, built dashboards, and derived business insights.

Dashboard Pages

1. Executive Dashboard
2. Recruitment Funnel & Recruiter Performance
3. Candidate Demographics & Salary Analysis
4. Recruitment Source & Time Analysis

KPIs

Total Applications, Interviews, Offers, Joined Candidates, Hiring Rate, Offer Acceptance Rate, Average Salary, Highest Salary.

Business Insights

Identified top recruitment sources, recruiter performance, department hiring trends, candidate demographics, salary analysis, and monthly hiring trends.

Skills

Excel, Python, SQL, Power BI, DAX, Data Cleaning, EDA, Data Modeling, Dashboard Design.

Conclusion

This project demonstrates a complete end-to-end Data Analytics workflow and is suitable for showcasing in a portfolio and discussing during interviews.
